

# XOPS

## Operations Management Platform

Streamline Operations & Digitize Workflows

## OVERVIEW

Modern fracturing operations demand precise coordination across planning, logistics, execution, and reporting—often under tight schedules and constantly changing field conditions. Designed for real-world operations, **XOPS** brings automation, real-time visibility, and design-vs-actual insights into a single, centralized platform. Intelligent workflows and integrated analytics streamline logistics, reporting, equipment tracking, and financial processes while helping teams quickly identify anomalies, manage NPT, and control costs. From pre-job planning through live execution and post-job reporting, XOPS delivers stage-by-stage operational clarity that connects field performance with confident decision-making.

## KEY FEATURES AND BENEFITS

### ■ Integrated Sales & Client Contacts

Manage pricebooks, client contacts, and proposals in one system—simplify commercial workflows and speed up approvals.

### ■ Shared Operations Calendar

Schedule work and share plans with stakeholders—keep crews, logistics, and clients aligned across jobs.

### ■ Real-Time Logistics & Inventory Tracking

Track material deliveries and onsite inventory live—maintain supply visibility and reduce operational delays.

### ■ Resource & NPT Management

Track non-productive time while managing personnel, equipment, and maintenance—improve utilization and operational efficiency.

### ■ Field Ticketing & Invoicing Workflow

Create, estimate, and approve field tickets digitally—streamline invoicing and reduce billing errors.

### ■ Automated Reporting Suite

Auto-generate reports for orders, BOLs, stage data, daily updates, and post-job summaries—standardize reporting and reduce manual effort.

### ■ Open Data Access & Export

Export any dataset for use in tools like PowerBI and Spotfire—enable deeper analysis and custom visualization. XOPS provides a secure, modern API that enables seamless access to frac job data—allowing customers to integrate real-time operational, logistics, and financial insights directly into their existing systems and analytics workflows.

## Activity Log

## Proppant Delivery Tracking

## ■ User Access & Version Control

Assign role-based user access—protect data integrity while maintaining accountability.

## ■ **Procurement Coordination**

Assign PO numbers and notify vendors of material needs—improve procurement accuracy and communication.

## APPLICATIONS AND CAPABILITIES

- **Automated BOL Data Capture**—Use QR codes and OCR to automatically pull in BOL data and reduce manual entry.
- **Automated Post-Job Reporting**—Generate and attach PJR, field ticket, and CSV links to post-job emails automatically.
- **Real-Time Equipment Hour Logging**—Capture pump hours after each stage to maintain a real-time equipment log.
- **Automatic Diagnostic Event Picks**—Auto-identify key events such as start/end job, open well pressure, ISIP, and more.
- **Design vs Actual Visibility**—Automation frees up engineer time while enabling clear D-vs-A visualizations to quickly identify anomalies in chemical and proppant volumes, costs, NPT, and stages per day.
- **Third-Party Data Integration**—Easily connect external providers (water measurements, diesel displacement, gas conditioning, offset well pressure) and visualize data within XOPS.
- **Equipment Maintenance Tracking**—Track equipment maintenance and usage down to each valve, seat, and oil change.
- **Operator Portal Access**—Share real-time job data, field tickets, post-job reports, inventory status, daily logs, and upcoming work with operator clients.

## READY TO RUN OPERATIONS WITH REAL-TIME VISIBILITY & AUTOMATION?
