System Requirements

Fracpro or *Stimpro* require the following resources from your computer system:

- **Operating System:** *Windows NT* or *Windows 2000 (for Fracpro License Server)*, *Windows XP*, *Windows Vista* or *Windows 7* (*Administrator* rights are required for installation)

- **CPU:** *Dual Core Pentium* or better

- **RAM:** 2GB recommended

- **Hard Disk:** *Fracpro* uses 330 MB for the program and associated files. *Stimpro* uses 89 MB

- **Video Card:** 1280 x 1024 minimum

- **Connectivity:** If you intend on doing Data Acquisition, then you will also need network or internet access for shared file or Ethernet access. Alternatively, if you plan on collecting serial data you will need a com port or USB to serial adapter.
